

HK Chems and Dyes

Dive into the World of HK Chems and Dyes: Building and Maintaining Your Dream Swimming Pool

Who we are:

We are a swimming pool construction company dedicated to creating stunning pools that go beyond design. Our focus is on incorporating safety features and environmental considerations to ensure that our pools are not only beautiful, but also functional and sustainable.

Welcome to HK Chems and Dyes

Welcome to HK Chems and Dyes, where we specialize in creating stunning swimming pools that will transform your backyard into a luxurious oasis. Our team of experts has years of experience in designing and building custom swimming pools that are tailored to your specific needs and preferences.

At HK Chems and Dyes, we believe that a swimming pool should be more than just a place to swim. It should be a place to relax, entertain, and create lasting memories with family and friends. That's why we offer a wide range of services, including swimming pool construction, maintenance, and accessories, to help you create the perfect pool for your lifestyle.

Types of Swimming Pools

In-ground pools are a popular choice for those who want a permanent, high-end addition to their home. These pools are built into the ground and can be customized in a variety of shapes and sizes.

Above-ground pools, on the other hand, are a more affordable option that can be installed quickly and easily. They come in a range of sizes and styles to fit any backyard.

Swim away to tranquility

Finally, infinity pools are the ultimate luxury pool experience. These pools create the illusion of blending seamlessly into the horizon, offering stunning views and a unique swimming experience.

Our Services

Cleaning

Skim the surface of the pool daily to remove debris like leaves and bugs. Use a pool brush to scrub the walls and floor of the pool weekly. Vacuum the pool regularly to remove dirt and other particles that have settled on the bottom.

Chemical Balance

Test the pool water regularly to ensure proper chemical balance. The pH level should be between 7.2 and 7.8. Chlorine levels should be between 1 and 3 ppm. Alkalinity should be between 80 and 120 ppm. Calcium hardness should be between 200 and 400 ppm.

Equipment Upkeep

Maintain the pool pump and filter by cleaning them regularly. Check for leaks or other damage to the equipment. Replace any damaged or worn parts as needed. Keep the pool cover clean and in good condition to prevent debris from entering the pool.

Swimming Pool Accessories

At HK Chems and Dyes, we believe that a swimming pool is more than just a place to swim. It's a space for relaxation, entertainment, and making memories with family and friends. That's why we offer a range of high-quality accessories to enhance your swimming pool experience.

Our pool covers are designed to keep your pool clean and safe when not in use, while our lighting options can create a stunning ambiance for evening swims. We also offer water features, such as fountains and waterfalls, to add an extra touch of luxury to your pool area. With our selection of accessories, you can customize your swimming pool to fit your unique style and needs.
